Profile

- Third-year B.E. Computer Science and Engineering student with strong interest in **Software Development** and **Data Engineering**
- Skilled in **Java, Python, SQL, React, and REST APIs** with hands-on experience in building responsive web applications and AI-powered projects
- Familiar with **data analysis, ETL basics, Power BI, and database management** concepts for data-driven applications
- Passionate about developing scalable **software solutions, problem-solving**, and working with real-world datasets and modern technologies

Experience

02/2025 – 04/2025
Coimbatore, India

Mindenious Edutech – Student Intern

Completed a Python-based AI/ML internship, developing and evaluating machine learning models through structured data preprocessing and analysis.

Projects during internship:

- House Price Prediction (Linear Regression)
- Email Spam Detection (Logistic Regression)
- Iris Flower Classification (Multiple ML algorithms)

Education

2022 – 2023
Coimbatore, India

Higher School Education, St Joseph's Matriculation Higher Secondary School ✨
Percentage: 80%

2023 – 2027
Coimbatore, India

Bachelor of Engineering | B.E Computer Science, Sri Krishna College of Engineering And Technology ✨
CGPA: 8.1

Skills

Programming Languages

Python, Java, SQL, C++

Data Analytics & Engineering

Power BI, Tableau, Excel, SQL, ETL Basics

Libraries & Tools

Pandas, NumPy, Matplotlib, Scikit-learn, Postman

Web Technologies

HTML, CSS, React, Vite, REST APIs

Databases & Platforms

MySQL, MongoDB, GitHub, Capacitor

Languages

Tamil (Native)

English

Certifications

Mindenious Internship Certification — AI/ML Internship

Infosys Springboard Certifications — C++, Java, SQL, DSA, OOAD, Web Development

Google & Cisco — Introduction to Cloud, Data Privacy, and Networking

Spoken Tutorial(IIT Bombay)

Projects

StudyFlow ✨

React.js, Productivity Tools, REST APIs, Vite

- Developed a productivity and **learning management platform** for students
- Built features for task management, study planning, and progress tracking
- Created a **responsive interface** using React.js and Vite
- Focused on improving **productivity** and **structured learning** workflows

HireMind AI ✨

React.js, AI Integration, REST APIs, Vite

- Developed an **AI-powered recruitment platform** for candidate evaluation and hiring support
- Built a **responsive frontend** using React.js and integrated AI-based functionalities
- Implemented **resume analysis** and candidate matching features
- Focused on improving recruitment efficiency and user experience

AI-Powered Shopping Cart

React.js, Vite, Capacitor, OpenAI API, Android Studio

- Developed a cross-platform shopping assistant with **AI-based product recommendations**
- Integrated **OpenAI API** for personalized user suggestions
- Built and deployed application for **Android and iOS platforms**
- Focused on improving user engagement and recommendation accuracy

Banking Management System

Spring Boot, React, MySQL, REST APIs, Postman

- Developed a full-stack banking application for **account management and transactions** (deposit, withdrawal, transfer)
- Designed and implemented **RESTful APIs** for seamless backend-frontend integration
- Ensured efficient data handling and persistence using **MySQL**
- Performed API testing and validation using **Postman** to improve system reliability
